**CITY OF SEATTLE
ANALYSIS AND DECISION OF THE DIRECTOR OF
THE DEPARTMENT OF PLANNING AND DEVELOPMENT**

Application Number: 2406922
Applicant Name: Kelly Byrne
Address of Proposal: 1514 18th Avenue

SUMMARY OF PROPOSED ACTION

Master Use Permit to subdivide one parcel into five (5) lots (Unit Lot Subdivision). Proposed lot sizes are: A) 1,880.7 square feet, B) 1,903 square feet, C) 1,429.2 square feet, D) 1,174.8 square feet, and E) 1,429.2 square feet. Related project: establish use and construct a three unit townhouse structure with the existing duplex structure to remain, MUP No. 2307469.

The following approval is required:

Short Subdivision - to subdivide one existing parcel into five lots, a unit subdivision. (Chapter 23.24.046, Seattle Municipal Code).

SEPA DETERMINATION: ☒ Exempt ☐ DNS ☐ MDNS ☐ EIS
☐ DNS with conditions
☐ DNS involving non-exempt grading, or demolition, or
involving another agency with jurisdiction.

BACKGROUND

Site and Vicinity Description

The approximately 7,800 square foot property is located on the east side of 18th Avenue between East Pine and East Pike Streets. Pedestrian access to the site is from 18th Avenue and vehicle access is from an existing alley.

The subject lot is zoned Lowrise 3 (L3) as are the lots on this block face extending between East Pine and Pike Streets. Across the alley to the east the zoning is Lowrise 1 (L1).

Proposal

The proposal is to subdivide one lot into five (5) unit lots. The parent lot is 7,800 square feet in area. The proposed lot sizes are: A) 1,880.7 square feet, B) 1,903 square feet, C) 1,429.2 square feet, D) 1,174.8 square feet, and E) 1,429.2 square feet. Vehicle access for all proposed unit lots will be from the alley. Parking for the three unit townhouse structure is provided within each individual unit. Parking for the existing duplex which faces 18th Avenue is provided by easement on proposed Unit Lots C and E. Pedestrian access to the alley for the duplex and to 18th Avenue for the triplex is provided by 2 pedestrian easements, one each along the north and south property boundaries. The new structures containing all proposed unit lots have been reviewed and approved for applicable code compliance under MUP No. 2407469.

Public Comments

The comment period for this proposal ended on October 20, 2004. No comment letters were received.

ANALYSIS - SHORT SUBDIVISION

Pursuant to SMC 23.24.040, no short plat shall be approved unless all of the following facts and conditions are found to exist:

1. *Conformance to the applicable Land Use Code provisions;*
2. *Adequacy of access for vehicles, utilities, and fire protection, as provided in Section 23.53.005;*
3. *Adequacy of drainage, water supply, and sanitary sewage disposal;*
4. *Whether the public use and interests are served by permitting the proposed division of land;*
5. *Conformance to the applicable provisions of SMC Section 25.09.240, short subdivision and subdivisions, in environmentally critical areas;*
6. *Is designed to maximize the retention of existing tree;*
7. *Conformance to the provisions of Section 23.24.045, Unit lot subdivisions, when the short subdivision is for the purpose of creating separate lots of record for the construction and/or transfer of title of townhouses, cottage housing, clustered housing, or single-family housing.*

Based on information provided by the applicant, referral comments from the Building Plans Examiner, the Drainage Section of DPD, the Fire Department, Seattle Public Utilities, City Light, and review by the Land Use Planner, the following findings are made with respect to the above-cited criteria:

1. *Conformance to the applicable Land Use Code provisions;*

The subject property is zoned Multi-Family Lowrise 3 (L-3) and all development must conform to the requirements of the applicable provisions of the Seattle Municipal Code (SMC). These provisions include, but are not limited to, requirements for setback, lot coverage, building height,

usable open space, landscaping, and parking. The establishment of use for the townhouses and their construction was reviewed under these provisions, approved, and permitted under MUP No. 2307469.

The allowable density for the L 3 zone is one dwelling unit per eight-hundred (800) square feet of lot area. The lot area is approximately 7,800 square feet, hence ten (10) townhouse units are allowed. Maximum lot coverage is fifty (50) percent for townhouse units. Lot coverage of the proposed townhouse was reviewed for conformance with this requirement and approved under MUP No. 2307469. Required parking for all units is provided on site and is accessed from the alley. Pedestrian access to all units is as described in *Site and Vicinity Description* above. Building set-backs, height limitations, and the provision of open space were reviewed for conformance to the development codes for this zone and were approved under the above-mentioned MUP.

2. *Adequacy of access for vehicles, utilities, and fire protection, as provided in Section 23.53.005;*

Vehicle access for all units is provided as described in *Criterion 1* above.

All utilities are available in this area. Seattle City Light provides electrical service to the proposed short plat. City Light has reviewed the proposal and requires an easement (#250430-3-015) to provide for electrical facilities and service to the proposed lots, which must be included on the final plat.

The Seattle Fire Department has reviewed and approved the proposed unit lot subdivision for the provision of adequate emergency vehicle and personnel access.

All proposed Unit Lots will be addressed from 18th Avenue. To assure adequate address identification of proposed Unit Lots C, D, and E address signage for these unit lots shall be posted at a location visible from 18th Avenue on or near either of the proposed pedestrian access easements. The pedestrian access easement shall be renamed to include an “address” easement, or a separate address easement shall be created and shown on the plat. A covenant may be recorded with the final plat to ensure that the address signage is maintained by all users.

3. *Adequacy of drainage, water supply, and sanitary sewage disposal;*

Review for drainage and sanitary sewage disposal indicates this unit lot subdivision adequately provides for these services.

Seattle Public Utilities has reviewed this proposal and assures water availability access for all parcels. A minimum five (5) foot easement for access is required for proposed Unit Lots C, D, and E across proposed Unit Lots A or B. Unit Lots A and B can obtain access directly from the right of way (See Water Availability Certificate # 20041527).

4. *Whether the public use and interests are served by permitting the proposed division of land;*

Unit Lot Subdivision allows for the subdivision of common wall (attached) ground related townhouse structures and residential cluster developments amongst other housing types. Ground related townhouse structures are allowed outright in the L-3 zone. This process therefore makes possible separate ownership of individual units that otherwise would be owned by one party and consequently some or all unit lots would be available on a shared ownership or rental basis only.

The proposed unit lot subdivision meets the minimum provisions of the Seattle Land Use Code for L-3 development regulations and the applicable approval criteria for short platting.

The public use and interests are thereby served by permitting the proposed division of land.

5. *Conformance to the applicable provisions of SMC Section 25.09.240, short subdivision and subdivisions, in environmentally critical areas;*

This site is not located in any environmentally critical area as defined in SMC 25.09.240, therefore this criterion does not apply.

6. *Is designed to maximize the retention of existing trees;*

There are no existing trees on the lot. However, as a part of approval for the construction of the townhouse and duplex structures (MUP 2307469) SMC 23.45.015 requires the planting of trees.

7. *Conformance to the provisions of Section 23.24.045, Unit lot subdivisions, when the short subdivision is for the purpose of creating separate lots of record for the construction and/or transfer of title of townhouses, cottage housing, clustered housing, or single-family housing.*

The three-unit townhouse structure was approved under MUP 2307469. The duplex structure is existing. Pursuant to SMC 23.24.045(A and B), sites developed or proposed to be developed with townhouses, cottage housing, clustered housing, or single-family housing may be subdivided into individual nonconforming unit parcels if development as a whole on the parent lot meets applicable Land Use Code development standards at the time of approval. To assure that future owners have constructive notice that additional development may be limited due to nonconformities the following statement shall be required to be included as a note on the final short subdivision: *The unit lots shown on this site are not separate buildable lots. Additional development on any individual unit lot in this subdivision may be limited because of the application of development standards to the parent lot pursuant to applicable provisions of the Seattle Land Use Code, Chapter 23 of the Seattle Municipal Code.*

Summary

The proposed Unit Lot Subdivision meets the criteria of SMC 23.24.040 and 045, Short Plats and Unit Lot Subdivisions. Pursuant to the above discussion and the following conditions, it is thereby approved.

DECISION - SHORT SUBDIVISION

The proposed Short Subdivision is **CONDITIONALLY GRANTED**.

CONDITIONS - SHORT SUBDIVISION

Conditions of Approval Prior to Recording

The owner(s) and/or responsible party(s) shall:

1. Submit the corrected final recording forms for approval and any necessary fees.
2. Insert the following on the face of the plat: "The unit lots shown on this site are not separate buildable lots. Additional development on any individual unit lot in this subdivision may be limited as a result of the application of development standards to the parent lot pursuant to applicable provisions of the Seattle Land Use Code, Chapter 23 of the Seattle Municipal Code."
3. Include the required utility easement from Seattle City Light on the face of the plat and in the legal descriptions of effected Unit Lots.
4. Include the utility easement from Seattle Public Utilities (Water Department) on the face of the plat and in the legal descriptions of effected Unit Lots.
5. Provide an address easement and post address signage for Unit Lots C, D, and E on Unit Lots A and B and visible from the street. Shown this location on the face of the plat.
